GinTonicheria

MARE + 1724

The gin mentor of new generation is Spanish and boasts the 5 main Mediterranean botanicals. The same company has created an ideal tonic, which is produced with water from Patagonia and chinino picked along one of the Inca's old paths at 1724 mt. (ideal altitude). **SOUTHERN WAVE.**

MONKEY + INDIAN FEVER TREE

A famous tonic, clean and fresh with a mellow/soft flavor, lets the Black Forest's Gin speak, which has a lot to say: an original tale, 47 ingredients with a lot of scents, intensity, harmony and complexity. **HISTORIC.**

GERANIUM + MEDITERRANEAN FEVER TREE

The traditional London style of best quality, with fresh and flowery notes (with an exclusive use of the geranium), meet the most Mediterranean of every tonic, with thyme's perfume, citrus's scent and rosemary. **QUALITY + INNOVATION.**

CAORUNN + TASSONI

In Scotland is produced this type of gin in small lots, with the wish to make the Celtic traditions revive. One of its peculiarity? The red apple of highlands. It is combine with "Tassoni" tonic (historical company in Lake Garda), which has an unique delicacy and citron's notes. The result is an "easy to drink" gin&tonic. From the Scottish hills to those in Garda... **SOFT MODERNITY.**

ELEPHANT + FENTIMANS 19:05 HERBAL

A very particular combination between a Gin connected with Africa (both for botanicals and elephant's safeguard) and a tonic water with fragrance of herbs and flowers. This latter, even if in a small amount, is noticed when drunk, but leaves much Gin persistence at the end. **ALTERNATIVE BOMB.**
